ENERGYGUIDE

Refrigerator-Freezer
• Automatic Defrost
• Side-Mounted Freezer
• Through-the-Door Ice

XYZ Corporation
Model ABC-4
Capacity: 23 Cubic Feet

Estimated Yearly Operating Cost

\$67

Cost Range of Similar Models

630 kWh
Estimated Yearly Electricity Use

Your cost will depend on your utility rates and use.

- Cost range based only on models of similar capacity with automatic defrost, side-mounted freezer, and through-the-door ice.
- Estimated operating cost based on a 2007 national average electricity cost of 10.65 cents per kWh.
- For more information, visit www.ftc.gov/appliances.

EPA Fuel Economy Estimates

These estimates reflect new EPA methods beginning with 2008 models.

CITY MPG 18 Expected range for most drivers 15 to 21 MPG	Estimated Annual Fuel Cost \$2,039 based on 15,000 miles at \$2.80 per gallon	HIGHWAY MPG 25 Expected range for most drivers 21 to 29 MPG

Combined Fuel Economy
This Vehicle
21
10 ——— 31
All SUVs

Your actual mileage will vary depending on how you drive and maintain your vehicle.

See the FREE Fuel Economy Guide at dealers or www.fueleconomy.gov

Building owners often can't get energy data for their buildings

Barriers:

- Separately-metered tenants
- Lack of clear procedures
- Utility policies and state privacy laws
- Lack of standardization

Benchmarking Data Needs

OMB No. 2602-0347

STATEMENT OF ENERGY PERFORMANCE
Office Sample Facility

Building No. 1679604
For 12-month Period Ending: May 31, 2009¹
Date SEP becomes Ineligible: September 28, 2009
Date SEP Generated: August 27, 2009

Notes:
1. Application for the ENERGY STAR label for commercial buildings is subject to the ENERGY STAR label and approval is received from EPA.
2. The ENERGY STAR label is based on the building's energy performance. A score of 85 or higher is required for the ENERGY STAR label.
3. Natural Gas values in units of volume (e.g., cubic feet) are converted to kBtu, with adjustments made for location based on facility type.
4. Values represent energy consumption, not emissions, for the 12-month period.
5. Based on the ENERGY STAR label for ventilation for acceptable indoor air quality, ASHRAE Standard 62 for thermal comfort, and IESNA Lighting Handbook for lighting quality.

The government estimates the average time needed to fill out this form is 2 hours. Evaluate facilities for entering energy data, PE facility inspection and validation, the SEP and uniform national standards for the label and for label verification (including label removal) in the Online Labeling System (OLAS), U.S. EPA (2007). OMB No. 2602-0347, ver. 08/07/09, U.S. GPO.

* Does not apply to multifamily buildings

Utilities Benefit by Supporting Benchmarking

- ▶ Customer service
- ▶ A gateway to other energy efficiency programs
- ▶ Insight into building loads to improve marketing and targeting for energy efficiency programs and inform infrastructure planning
- ▶ Data to analyze energy efficiency programs and validate savings

Report for the California Public Utility Commission:

Utility-led
benchmarking
programs yielding
substantial energy
savings

April 2012

Of those who benchmarked:

- 62% took energy management actions
- 84% planned or implemented energy efficiency improvements
- 81% link improvements to utility efficiency programs
- 82% said utility training had been sufficient to benchmark buildings on their own

Early Findings from Energy Benchmarking in New York

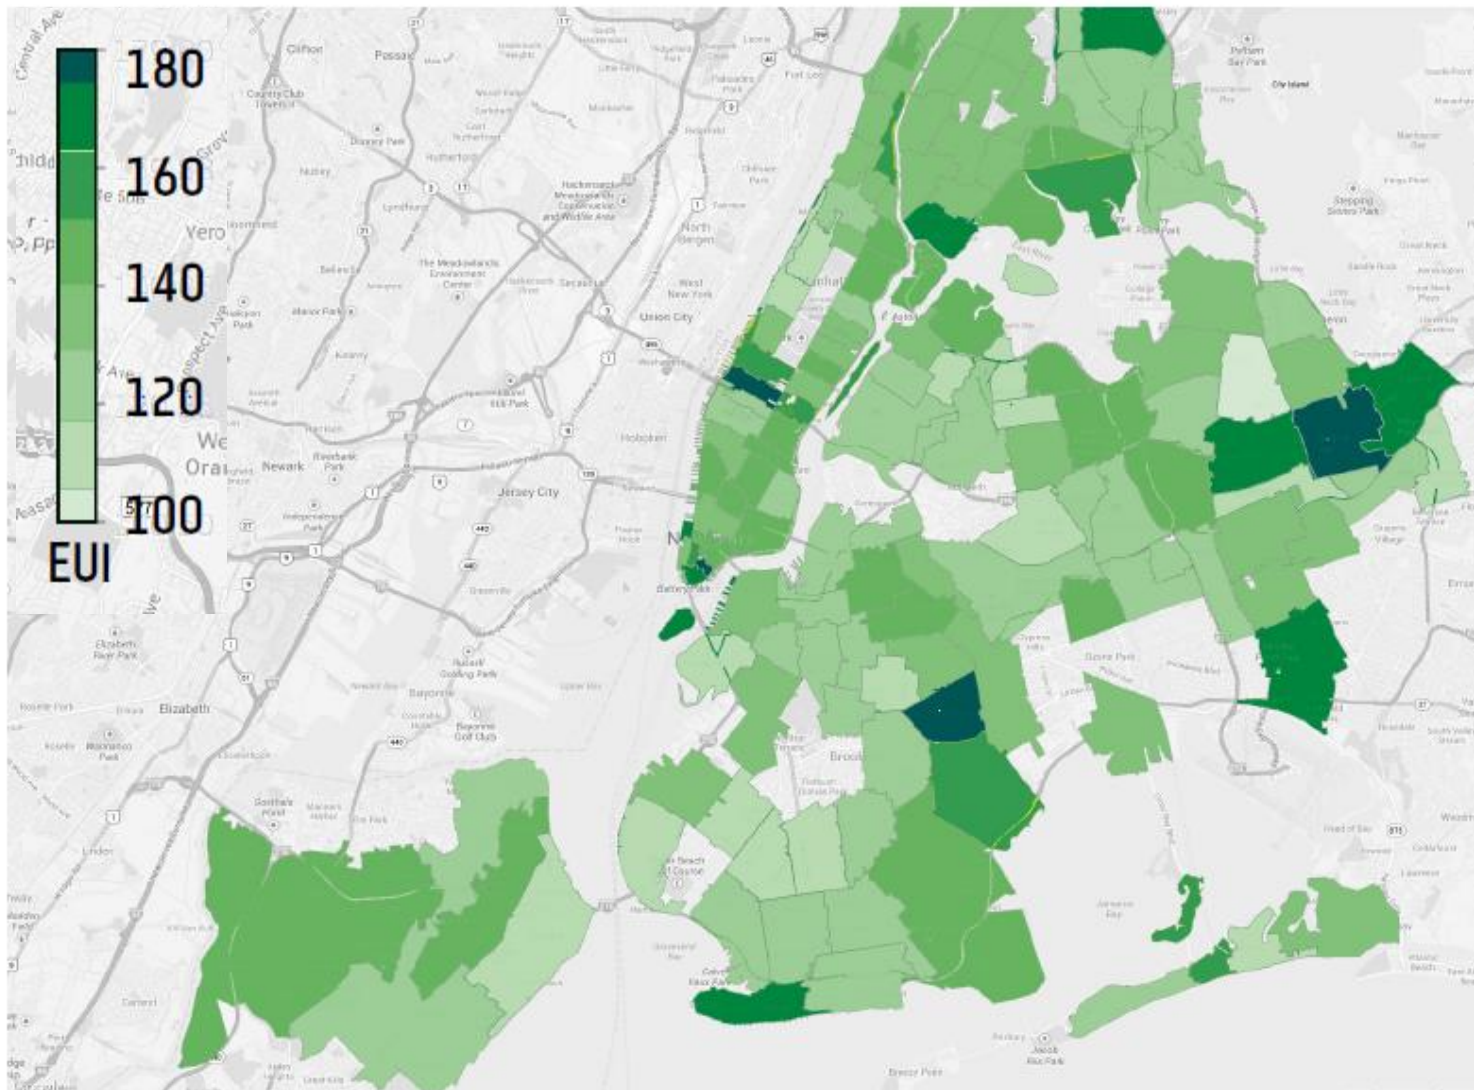

2012: Within the multifamily sector, the poorest performing buildings **use 4 times the energy** of the highest performing buildings.

[Fig. 11] Variation in Source EUI by Sector (5th-95th percentile)
Source: NYC Mayor's Office

2013: Energy use varies by a factor of about three for multifamily buildings (5th-95th percentile)

Momentum is building...

THE # OF CITIES THAT BENCHMARK IS ON THE RISE...

- ▶ July 2011: NARUC resolution
- ▶ November 2013: NASUCA resolution
- ▶ DOE Voluntary Code of Conduct
- ▶ Better Buildings Energy Data Accelerator
- ▶ PUCs currently considering issue of data aggregation
- ▶ More utilities funding efforts through energy efficiency portfolios
