

Methane Emissions and Solutions in Natural Gas

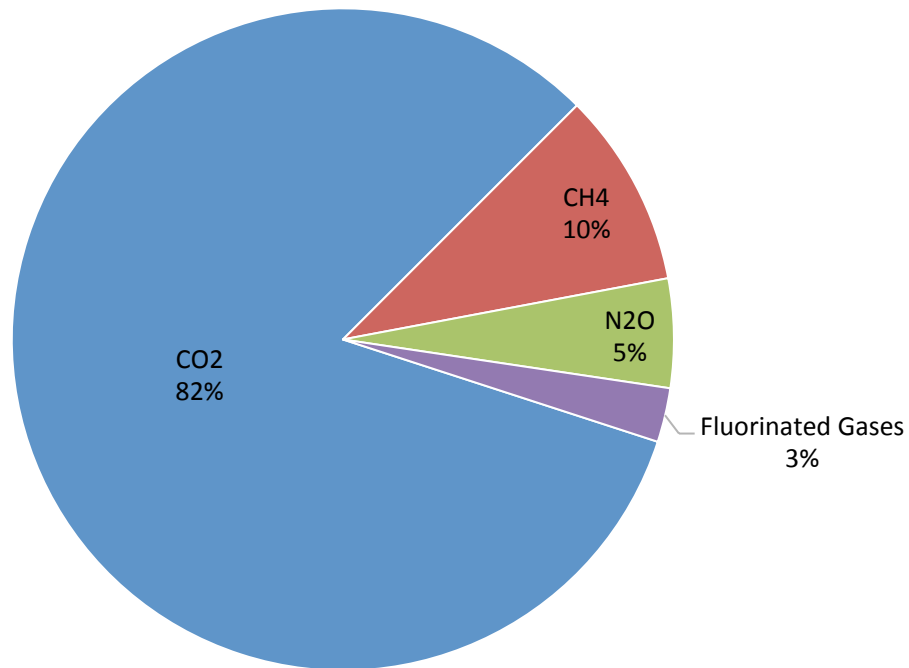

NECPUC Symposium
June 9, 2015

Erica Bowman
Vice President, Research and Policy Analysis

U.S. Greenhouse Gas Emissions

U.S GHG Emissions: 2013
MMT CO² equivalent

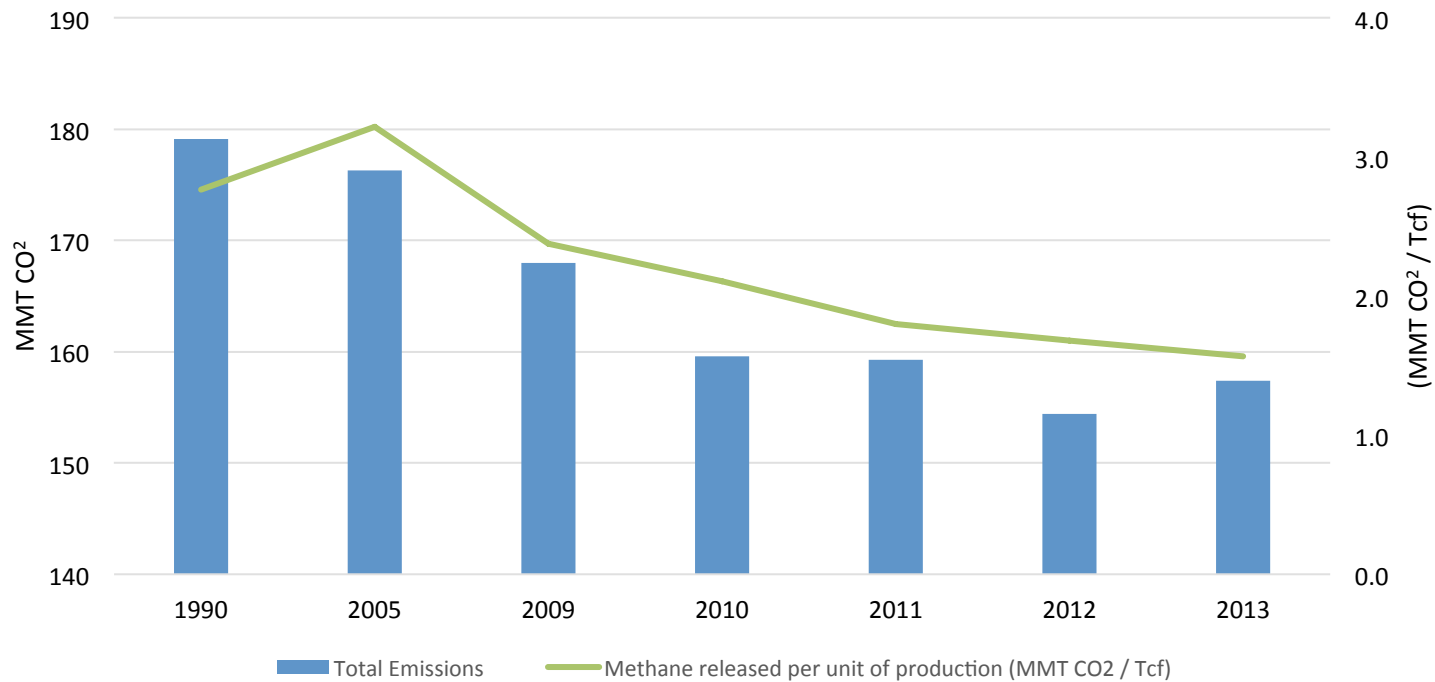

Methane emissions comprise 10% of the total U.S. GHG emissions.

Overall, methane emissions from natural gas systems contribute 2.4% towards total U.S. GHG emissions.

Production and Emissions

Natural Gas Methane Emissions
Per Unit of Production
(MMT CO²/Tcf)

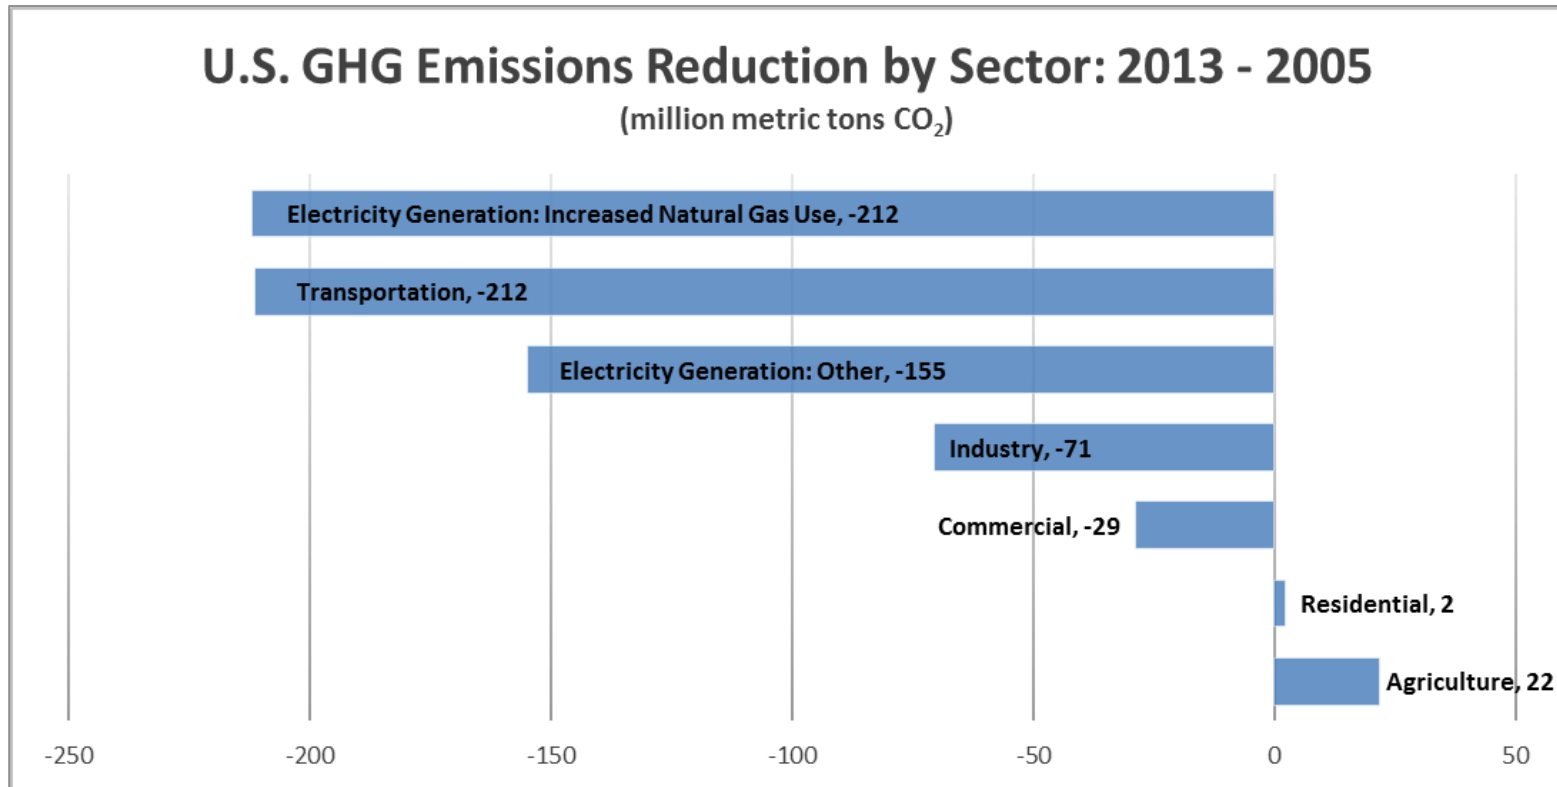

Source: EIA, EPA 2015

Natural gas emissions per unit of production have declined 7 percent since.

Emission Reductions from 2005

Source: EIA 2015, EPA 2015
